

SAMSON OCHIENG ODWORI

About Me

I am an entry-level IT professional with skills in programming, networking, cybersecurity, data analysis, and web design. As an IT student, I am eager to apply my knowledge and solve technical challenges.

I have three years of experience in baking, machine operations, and ingredient mixing. I also worked as a sales agent, developing communication and customer engagement skills. In 2022, I served as a polling station officer in Kenya, gaining experience in data management and leadership.

I have worked in marketing, focusing on campaign management and client relations. For the past three years, I have freelanced in research, IT projects, and online tutoring, strengthening my critical thinking and time management.

With this diverse experience, I am confident I can bring value to any role and contribute effectively to the success of your team.
